

Ducted Vacuum Specification Sheet

Compact and easy-to-install, high performance ducted vacuum system.

V2SC

Valet's reputation for durability and non-stop vacuum performance is continued with the new and improved V2SC. This latest version boasts a 2.4 HP high lift motor and amazing soft-start technology and has become a popular choice throughout Australia and New Zealand.

Valet's technical development doesn't stop with motor performance; the V2SC combined with the new Valet SC Hose series allows full control of the suction speed so you can vary the vacuum suction power to suit any need, from effective cleaning in the most delicate areas to high lift power for deeper carpet penetration.

Nothing cleans like the power of the Valet V2SC Series.
